Asset Tracking

**TRACK YOUR
ASSETS with the
CalAmp® TTU-720
and TTU-2820**

Competitive Price, Competitive Technology, Competitive Edge

Ideal for businesses that need to locate and track heavy machinery and high-value assets.

Track your most important assets with pinpoint precision. Alerts are sent out when unauthorized movement is detected reducing theft or off-limit usage. The CalAmp TTU-720 and TTU-2820 include powerful features including superior cellular and GPS quality, motion sensing accelerometer, internal antennas and simple installation. Both are designed to dramatically reduce cost while providing excellent field reliability for virtually any mobile asset.

Gain peace of mind by knowing where your equipment should be.

Benefits -

- › **Vehicle Monitoring** – Responds instantly to pre-defined threshold conditions.
- › **Visibility** – Track equipment, vehicles, heavy cargo and shipments.
- › **Asset Utilization** – Locate equipment closest to job sites.
- › **Property Protection** – Reduce theft, vandalism and unauthorized use.
- › **Easy to Use** – Portable design with OTA (over the air) configuration.
- › **Manager App** - flexibility of monitoring the workforce with real-time data from the field using the mobile devices.

Scalability and Flexibility
