*This offer is only valid with a new activation of a smartphone or tablet.

ONE MONTH FREE

Customers who sign up for Workforce Manager will get their first month of service for free! An entire month of free activation can give customers a leg up on their competition, putting the keys to success squarely in their hands. Workforce Manager sports a myriad of features, all intelligently designed to make your business processes efficient and profitable. Workforce Manager's versatility comes from highly configurable modules for Timekeeping, Dispatching, Intelligent Tracking**, Wireless Forms, Enhanced Push-to-Talk (EPTT)**, and Messaging. The only way to take advantage of the free month promotion is by purchasing a new license of Workforce Manager and activating it with a smartphone or tablet.

AT&T WORKFORCE MANAGER

Workforce Manager strengthens communication between dispatchers and mobile workers. The intricate features, improve transparency over mobile workforces in the field, while delivering workflow processes more effectively. Combining Workforce Manager with EPTT results in a highly customizable business plan, while opening communication channels with your employees in the field.

Wireless forms

Collect data, images, and signed documents from the field. Send content back to the office without worrying about illegible handwriting or inaccurate information from workers operating away from the office.

Mobile dispatching

Create and send new orders from the office to the field directly from the app. Users can also view, update and reallocate jobs or other business tasks from within WFM.

EPTT

Make calls in near real-time and preconfigure group calls of up to 250 people through AT&T enabled services.

Mobile timekeeping

Log and record your mobile employees' time punches and even see where those punches occurred with geostamp assistance.
